

Current Projects

Children's Safety Australia Inc. is currently undertaking a number of exciting ventures which we look forward to pursuing in 2008 and beyond in conjunction with our sister organisation, Children's Safety Australia Inc.. These projects include:

Children's Safety Book

This interactive book is designed for lower to middle primary school students to be read with their parent/carer or teacher. It includes fundamental children's safety concepts, a range of activities enabling the practical application of these safety concepts, a quiz, and further information for parents and teachers. Look out for its release in 2008!

Children's Safety Program for Schools

Key components of this initiative are based on the Queensland Crime and Misconduct Commission (CMC) recommendations and child protection experts input and include:

- Progressive, developmentally-appropriate content for Prep – Year 12 students;
- User-friendly lesson plans and support materials to assist teachers in implementing regular training sessions;
- A multi-systemic approach, targeting students, teachers and parents; and
- Meeting the needs of both boys and girls, appreciating gender differences and subsequent content and delivery requirements.

This initiative is a long term project requiring significant input from a broad range of parties. If you are interested in becoming involved, please contact us.
